GEPHI

- Open-source graph visualization and manipulation software
  - Graph as in a network, not a plot
  - Reads in graph data and organizes it visually
  - Can also calculate statistics and edit data
  - Stand-alone application, no code required
EXAMPLES

• The Graph of Ideas
  • (http://www.visualizing.org/visualizations/graph-ideas)

• Marvel Universe Social Graph
  • (http://exposedata.com/marvel/)
• Les Miserables data
  • Size by degree
  • Color by cluster
• Label data
IMPRESSIONS

• A solid product with a few rough edges

• A bit of a learning curve, but easy to use after

• No Undo function

• Wow factor to time spent: high

• Verdict: Receives the Sam Hatfield Seal of Approval!
